

## Introducing ReadCloudVET

We are experts in VETDSSS and we make it easier for schools to provide quality VET programs.

**ReadCloudVET** is a division of ReadCloud Ltd, an EdTech company providing software and education solutions to schools across Australia, and brings together three RTOs that are all leaders in **VET Delivered to Secondary School Students (VETDSSS)**.

ReadCloudVET is a fresh approach to VETDSSS

## ReadCloudVET RTOs

The group of **ReadCloudVET** RTOs specialise in **VETDSSS** and collectively support the delivery of more than 50 qualifications in secondary schools nationally to 15,000 students. We provide everything you need for successful VET delivery.

Our RTOs share common systems, policies and school auspicing processes, making it easier for trainers and VET Coordinators in schools who want to ensure their students get the best VET learning experience possible.

We provide:

- High-quality systems, processes, assessments and resources
- Expertise in secondary school VET programs
- A flexible and responsive approach
- A dedicated consultant for each Partner School
- Intuitive and simple platforms

## Partner Sites

Our **Partner Sites** offer a secure and easy-to-navigate support site for schools, including important dates and deadlines across the school year, straight forward instructional information and links relating to administrative requirements.

## ReadCloudVET is a fresh approach to VETDSSS

For more information visit [readcloudvet.com](https://readcloudvet.com)  
or contact our team direct at [vetsales@readcloud.com](mailto:vetsales@readcloud.com)

## ReadCloudVET Hub

The **ReadCloudVET Hub** is our online portal where teachers and students can access learning resources, assessment materials and templates to support task completion for their VET programs.

A clean and simple layout allows teachers to see exactly what their students see, as well as providing them with assessment guides and additional support documentation in their roles.

Students can download tasks and templates and access learner resources offline, enabling them to work independently in and out of the classroom regardless of access or connectivity.
